What E-Learning Experts Say

"A very effective learning tool."

Dr. Albert Thiele, business educator

"I would like to congratulate you on your competence training courses!"

Joachim Sucker, blogger on adult education

"I found the educational structure of the courses extremely well done."

Dr.-Ing. habil. Hartmut Barthelmeß

"... technically, theatrically, cinematically and instructionally at the highest standard!"

Sünne Eichler, Learntec Congress Comitee, AK Learning Solutions

"Really great! The videos are very engaging!"

Dr. Carsten Schnekenburger, DHBW

Licensing model 1: Cloud Services

For quick access to digital training

We provide you with a comprehensive, ready-to-use Learning Management System (LMS). It includes all e-learning programs. You can make these e-learning courses available to individual employees, several different employees or groups of employees. They can access the e-learning programs at any time, from anywhere. All they need is an Internet connection. However you want to use our courses, we have a licensing model to suit:

Online Academy Enrollment License

Usage-based

You purchase a certain number of enrollments (a minimum of 100 enrollments). For each enrollment, the business can allocate one e-training course to an individual user. These licenses remain active for 12 months. During this year-long period, users have full access to their respective assigned e-training courses.

Online Academy Flat Rate License

User-based

You can assign individual e-trainings or any number of e-trainings to a number of users determined by you (minimum number of 25 users). Pricing is based on the number of users, regardless of the number of assigned e-trainings. Users can use the assigned e-trainings throughout the license period. You will have access to all available language versions of our courses and can decide which languages you would like us to activate.

Online Academy Corporate License

based on company size and number of employees:

We will provide you with our entire catalogue in your customized Online Academy (cloud-based learning platform) designed for your company. An unlimited number of users shall have access to the entire PINKTUM catalogue, including all new releases and updates. The price is calculated according to the size of the company or the number of users.

Licensing model 2: Using the Client's Own LMS

Files provided to companies with their own LMS

We also have a simple solution for companies already using a Learning Management System. We offer our standard content for integration into your own learning management system. For this purpose, we deliver the files of the e-trainings as SCORM packages (SCORM 1.2 or SCORM 2004) and Tin Can (xAPI) formats. This gives you complete independence and you can manage e-learning in your usual Learning Management System. Depending on the model you choose, you can make e-learning courses available to an unlimited number of employees, for an unlimited time.

Rental License

You can select individual e-trainings from the entire standard content portfolio. The individual prices apply for a period of use of 12 months each. The number of users is unlimited.

Purchase License

You can select individual e-trainings from the entire standard content range. The individual prices are valid for an unlimited period of use. The number of users is unlimited.

Corporate License

You receive access to the entire PINKTUM catalogue in SCORM/xAPI format for integration into your LMS. Newly added content will also be delivered during the license term upon request.

When acquiring an e-training in multiple languages, a 25% discount of the original price shall apply for each additional language.
